## The Migration Process

Are you ready to move your data into JobNimbus?  
Simply follow the steps below to get everything in place.

START

Will you be syncing JobNimbus with QuickBooks?

No

2 Schedule a call with the data migration team!

<b>What is data migration?</b>	+
<b>What systems can be migrated?</b>	+
<b>Is there a cost?</b>  Each project is unique, and factors like the number of locations, volume of documents and photos, and years in business. Larger data sets, especially with many high-resolution photos, may increase migration costs. We'll provide a quote that captures the full scope of work needed to transfer your critical data seamlessly.  <b>Affordable Rates:</b> Our pricing typically ranges from \$4,000 to \$10,000, based on the data volume and effort needed to extract and transform it for smooth integration with JobNimbus. In some cases, the cost may be lower, offering a competitive edge over providers charging \$10,000 to \$30,000 for similar services.  <b>Average Migration Costs:</b> <ul style="list-style-type: none"><li>• Single-location businesses with minimal data: \$2,000 - \$4,000</li><li>• Moderate data volume, multiple years or more images: \$4,000 - \$10,000</li><li>• High-volume data, multiple locations, or extensive documentation: \$8,000 - \$15,000.</li></ul> With our partners, you'll experience efficient, secure data migration without the high costs typical in the industry. We're here to ensure your transition is smooth, setting you up for long-term success.	-
